Artur Rashkevich

Senior Fullstack Engineer — Web Platform

Profile

Senior Fullstack Engineer with 10 years in software delivery, focused on large customer-facing web platforms built with React, TypeScript and Node.js. Has designed shared React platforms behind four airline brands, built a Lit-based design system, supported CI/CD release and production operations, and now owns application and microfrontend architecture, service integration boundaries and ADRs at Lufthansa Systems. AWS Certified Solutions Architect.

Experience

Senior Software Engineer / Architect — Jan 2026 — Present

Lufthansa Systems

- Own application and microfrontend architecture for the primary airline web platforms, from front-end composition through to service integration boundaries.
- Define technical roadmaps and engineering standards for scalable, cloud-native product delivery and shared user experiences.
- Record cross-team decisions on maintainability, integration, tooling and deployment as Architecture Decision Records.

Stack: React, TypeScript, Node.js, microfrontends, Azure, Kubernetes

Key Software Engineer — Sep 2024 — Jan 2026

Johnson & Johnson

- Delivered across the Next.js/React front end and Node.js/NestJS backend of a regulated surgical planning platform.
- Worked directly with Product and Design to turn Figma specifications into production UI and evolve the shared design system.
- Helped move the backend from Java to Node.js/NestJS and planned the accompanying Azure to AWS data migration.

Stack: Next.js, React, TypeScript, Node.js, NestJS, AWS, PostgreSQL

Senior Software Engineer — Jun 2022 — Sep 2024

Lufthansa Systems

- Built long-lived customer-facing web applications for Lufthansa, Swiss, Austrian and Brussels from one shared React codebase.
- Created the Lit-based web component design system that let four brands diverge visually without forking the platform.
- Supported regular delivery, release and production operations in Azure Cloud with CI/CD practices.

Stack: React, Lit, TypeScript, Azure, CI/CD

CERTIFICATIONS

AWS Certified Solutions Architect – Associate
Amazon Web Services · Jul 2026

Web Application Security
SECURITUM

MS-20497 Software Testing
Microsoft

FRONT-END

React, TypeScript, JavaScript
Next.js, HTML, CSS
Design Systems, Lit, Web Components
Microfrontend Architecture
Angular, React Native

BACK-END & DELIVERY

Node.js, NestJS
API & Integration Design
PostgreSQL, MySQL
CI/CD, GitLab CI, Git, Docker
Automated Testing, Codeception, Selenium
Release & Production Operations
AWS, Azure
Terraform, Kubernetes, Helm
Rust, Tokio, gRPC
Web Security, ADRs

EDUCATION

IT and Econometrics
WSB School of Banking
2011 – 2015

LANGUAGES

Polish — C2
English — B2

Experience (continued)

Technical Lead · Monterail · Dec 2020 — May 2022 — Promoted from JavaScript Developer to Senior Front-End Developer, then Technical Lead, inside 18 months; client-facing Angular delivery, release preparation, framework upgrade strategy, technical documentation and third-party front-end libraries.

Contract & Independent Work

Full Stack Developer & Cloud Engineer

Apr 2022 — Jul 2024

Flippico · Contract, alongside primary role

- Built a greenfield platform end to end — React Native mobile, Angular web, React admin, NestJS backend and Rust services.
- Owned architecture and stack decisions across product surfaces, backend services and deployment.
- Owned the Terraform-provisioned AWS estate, running on Kubernetes with Helm.

Stack: React Native, Angular, React, NestJS, Rust, AWS, Kubernetes, Helm, Terraform

KSeFGPT — AI-Assisted E-Invoicing Platform

Jan 2026 — Present

Independent initiative

- Architected an AI-assisted platform from Rust services and gRPC contracts through to the Next.js interface.
- Designed LLM/MCP tooling for regulatory invoice workflows and domain operations.
- Built RAG workflows over PostgreSQL-backed services to ground outputs in KSeF schemas, validation rules and regulatory invoice context.

Stack: Next.js, Rust, gRPC, PostgreSQL, Kubernetes, LLM/MCP, RAG

Full Stack Developer · !NSPiRE · May 2019 — Jul 2022 — Mobile application and supporting microservices built from scratch and deployed to AWS.

Earlier

Front-End Developer · RetencjaPL · Apr 2019 — Nov 2020 — Application for storage reservoir management.

Front-End Developer & Application Tester · GetResponse · May 2016 — Apr 2019 — Marketing email editor; test automation with Codeception and Selenium; security testing.

Automation Test Developer · POSTDATA SA · Dec 2015 — May 2016 — Test automation for the Polish Post's primary application.
